

ASCA Benchmarking

www.ascassociation.org/ASCABenchmarking

Measure Your Performance.

ASCA's online Clinical & Operational Benchmarking Survey provides valuable data about your ASC that you can compare with national performance statistics on clinical outcomes, staff indicators, billing performance and more.

ASCA is the only national association committed to providing the resources and representation that all ASCs need to thrive in today's competitive health care marketplace.

Designed by ASC benchmarking experts, the program features:

- Easy-to-read reports that allow for quick comparisons between your ASC and national and specialty trends
- Save-as-you-go data entry
- Dynamic filtering capabilities that allow you to focus in on the information most relevant to your facility
- Convenient 24/7 access to your data reports
- Streamlined, quick-to-complete survey design
- Real-time data review that helps ensure the accuracy of the data you provide

Only ASCs that subscribe to the program *and* submit data reports before April 30, 2019, will be able to participate in all four quarters of the 2019 survey.
