Thank you for your expression of interest in being a AAAHC Certification Technical Panel. Please submit this form with a current resume.

Overview of the role of the Certification Technical Panel

Purpose

A Certification Technical Panel (CTP) is activated when the need for specialty certification is identified. The purpose of the CTP is to provide clinical guidance on the development of specialty programs.

Function and Scope of Work

The CTP will provide guidance, in the design of certification products while aiming to achieve the following:

- Assuring evidence based best practices and clinical standards are adopted in the development and review of specialty programs.
- Analyzing utilization patterns, data and metrics to identify opportunities to develop/revise standards aimed at improving patient care.
- Evaluate and monitor industry trends that impact or improve specialty care.
- Support the development and revision of specialty education programs in the form of webinars, e-learning or industry presentations.
